

Lesson 13 Exercise (Case Sensitivity)

1. Ensure you have viewed the video (associated with this exercise) at [this link](#)

If you are viewing a printed copy of this exercise locate the video on the YouTube channel either directly on the channel or via the supporting website.

2. How would you alter each the following program 'snippets' to ensure they were consistent with the 'case sensitivity' recommendations for variable identifiers (as recommended in the video)?

```
first_number = 1
first_number = first_number + 1
print (First_number)
```

```
Number1 = 1
Number1 = number1 + 1
print (number1)
```

```
Number1 = 1
Number1 = NUMBER1 + 1
print (number1)
```

3. Predict the runtime for each of the program snippets above. Check your answers by entering the code EXACTLY as shown above and run each to check your answer.

END
